Country:

Germany/Russian Zone

Subject:

Airports in Germany Inspected by the Russians

25X1

25X1

25X1

1. Beginning the last week in April, Russian inspection groups guided by German officials traveled through Soviet and Polish occupied territory inspecting former German airports, whether or not occupied by the Red Air Force.

25X1

2. The command of an armored army in Saxony, located at Halle is believed to be responsible for determining the usefulness of airfields and to issue orders to its subordinate units directing the improvement of facilities.

3. The right hand column refers to the potential suitability of the field.
